

## 1946-1947 Milan, Italy - UFO Occupant Sighting

Description of incident. Occupant in spacesuit descended down to the ground from UFO craft.

Witness description:

Around sunset the bright lights spun. The spaceman descended from the middle with the saucer in mid air he floated down as if by a wrench cord attached to his suit. The suit was white. A lot of witnesses. Near Milan, Italy

What makes this story interesting is Silvana had no exposure to any kind of UFO literature. She was brought up by Nuns after the SS arrested her mother for passing out anti Nazi literature before the war ended. The UFO incident was around or about 1946 or 1947. She estimates her age was then 7. The hypothesis? The Alien wore the protective suit as radiation protection coming from the spaceship. Assuming afterwards he took off his spacesuit under camouflage and afterwards blended into the crowd looking like a typical Italian male of that era.

More information on silvan's 1947 sighting by her description.

The lights rotated but not the saucer itself. The spacesuit reminded of a divers outfit but was clearly not the same thing. The rotating lights hurt the eyes to look at directly. She saw no cable lowering the spaceman down gently. There were two Nuns in the car and several children Silvana's age. Several days later the same two nuns were discussing an article in the newspaper where the article dismissed the incident as an airplane sighting. She could overhear the Nun's clearly saying that the newspaper account was not what they witnesses and they were perplexed why the news media would lie to the public.
